

As part of its activities and in line with its principles, **3R Energia s.r.l.** aims to continuously identify and meet the needs of its stakeholders, with a focus on constantly improving its products and processes, as well as consolidating and expanding its position within the reference market.

Through the issuance of this Policy, the Top Management of **3R Energia s.r.l.** formally commits to ensure the continuous satisfaction of its customers in delivering the provided services, by applying a Quality Management System compliant with UNI EN ISO 9001:2015, oriented towards the constant improvement of business processes.

In defining its Quality Policy, the Management of 3R Energia s.r.l. has established the following general objectives:

- To understand and consistently meet the needs of its customers;
- To achieve a high level of reliability, safety, and cost-effectiveness of the provided services, fully complying with contractual requirements, laws, regulations, and applicable standards;
- To continually consolidate and develop the professionalism of its human resources, fostering mutual trust and satisfaction, while enhancing its market image;
- To ensure proper and effective management of all activities influencing the quality of the provided services, documenting and appropriately storing these activities;
- To optimize the management of internal processes and the use of available resources to ensure their ongoing adequacy, suitability, and potential for increased efficiency;
- To plan and ensure the constant review and improvement of the Quality Management System and, consequently, the effectiveness of the related implementation processes.

The Management of **3R Energia s.r.l.** is committed to disseminate its Quality Policy both internally and externally, ensuring that its principles are shared, understood, and upheld by employees, collaborators, and all interested parties.
